No consideration to trade should be made without thoroughly understanding and reviewing the risks involved in such trading. If you are unsure, you must seek professional advice on the same.

In considering whether to trade or authorize someone to trade for you, you should be aware of or must get acquainted with the following:-

1. BASIC RISKS:

1.1 Risk of Higher Volatility:

Volatility refers to the dynamic changes in price that a security/derivatives contract undergoes when trading activity continues on the NSE/BSE/MSEI. Generally, higher the volatility of a security/derivatives contract, greater is its price swings. There may be normally greater volatility in thinly traded securities/derivatives contracts than in active securities /derivatives contracts. As a result of volatility, your order may only be partially executed or not executed at all, or the price at which your order got executed may be substantially different from the last traded price or change substantially thereafter, resulting in notional or real losses.

1.2 Risk of Lower Liquidity:

Liquidity refers to the ability of market participants to buy and/or sell securities / derivatives contracts expeditiously at a competitive price and with minimal price difference. Generally, it is assumed that more the numbers of orders available in a market, greater is the liquidity. Liquidity is important because with greater liquidity, it is easier for investors to buy and/or sell securities / derivatives contracts swiftly and with minimal price difference, and as a result, investors are more likely to pay or receive a competitive price for securities / derivatives contracts purchased or sold. There may be a risk of lower liquidity in some securities / derivatives contracts as compared to active securities / derivatives contracts. As a result, your order may only be partially executed, or may be executed with relatively greater price difference or may not be executed at all.

1.2.1 Buying or selling securities / derivatives contracts as part of a day trading strategy may also result into losses, because in such a situation, securities / derivatives contracts may have to be sold / purchased at low / high prices, compared to the expected price levels, so as not to have any open position or obligation to deliver or receive a security / derivatives contract.

1.3 Risk of Wider Spreads:

Spread refers to the difference in best buy price and best sell price. It represents the differential between the price of buying a security / derivatives contract and immediately selling it or vice versa. Lower liquidity and higher volatility may result in wider than normal spreads for less liquid or illiquid securities / derivatives contracts. This in turn will hamper better price formation.

1.4 Risk-reducing orders:

The placing of orders (e.g., “stop loss” orders, or “limit” orders) which are intended to limit losses to certain amounts may not be effective many a time because rapid movement in market conditions may make it impossible to execute such orders.

1.4.1 A “market” order will be executed promptly, subject to availability of orders on opposite side, without regard to price and that, while the customer may receive a prompt execution of a “market” order, the execution may be at available prices of outstanding orders, which satisfy the order quantity, on price time priority. It may be understood that these prices may be significantly different from the last traded price or the best price in that security / derivatives contract.

1.4.2 A “limit” order will be executed only at the “limit” price specified for the order or a better price. However, while the customer receives price protection, there is a possibility that the order may not be executed at all.

1.4.3 A stop loss order is generally placed “away” from the current price of a stock / derivatives contract, and such order gets activated if and when the security / derivatives contract reaches, or trades through, the stop price. Sell stop orders are entered ordinarily below the current price, and buy stop orders are entered ordinarily above the current price. When the security / contract reaches the pre-determined price, or trades through such price, the stop loss order converts to a market/limit order and is executed at the limit or better. There is no assurance therefore that the limit order will be executable since a security / derivatives contract might penetrate the pre-determined price, in which case, the risk of such order not getting executed arises, just as with a regular limit order.

1.5 Risk of News Announcements:

News announcements that may impact the price of stock / derivatives contract may occur during trading, and when combined with lower liquidity and higher volatility, may suddenly cause an unexpected positive or negative movement in the price of the security / contract.

1.6 Risk of Rumors:

Rumors about companies / currencies at times float in the market through word of mouth, newspapers, websites or news agencies, etc. The investors should be wary of and should desist from acting on rumors.

1.7 System Risk:

High volume trading will frequently occur at the market opening and before market close. Such high volumes may also occur at any point in the day. These may cause delays in order execution or confirmation.

1.7.1 During periods of volatility, on account of market participants continuously modifying their order quantity or prices or placing fresh orders, there may be delays in order execution and its confirmations.

1.7.2 Under certain market conditions, it may be difficult or impossible to liquidate a position in the market at a reasonable price or at all, when there are no outstanding orders either on the buy side or the sell side, or if trading is halted in a security/ Derivatives contract due to any action on account of unusual trading activity or security / derivatives contract hitting circuit filters or for any other reason.

1.8 System/Network Congestion:

Trading on exchanges is in electronic mode, based on satellite/leased line based communications, combination of technologies and computer systems to place and route orders. Thus, there exists a possibility of communication failure or system problems or slow or delayed response from system or trading halt, or any such other problem/glitch whereby not being able to establish access to the trading system/network, which may be beyond control and may result in delay in processing or not processing buy or sell orders either in part or in full. You are cautioned to note that although these problems may be temporary in nature, but when you have outstanding open positions or unexecuted orders, these represent a risk because of your obligations to settle all executed transactions.

2. As far as Derivatives segments are concerned, please note and get yourself acquainted with the following additional features:-

2.1 Effect of “Leverage” or “Gearing”:

In the derivatives market, the amount of margin is small relative to the value of the derivatives contract so the transactions are ‘leveraged’ or ‘geared’. Derivatives trading, which is conducted with a relatively small amount of margin, provides the possibility of great profit or loss in comparison with the margin amount. But transactions in derivatives carry a high degree of risk.

You should therefore completely understand the following statements before actually trading in derivatives and also trade with caution while taking into account one’s circumstances, financial resources, etc. If the prices move against you, you may lose a part of whole margin amount in a relatively short period of time. Moreover, the loss may exceed the original margin amount.

A. Futures trading involve daily settlement of all positions. Every day the open positions are marked to market based on the closing level of the index / derivatives contract. If the contract has moved against you, you will be required to deposit the amount of loss (notional) resulting from such movement. This amount will have to be paid within a stipulated time frame, generally before commencement of trading on next day.

B. If you fail to deposit the additional amount by the deadline or if an outstanding debt occurs in your account, the stock broker may liquidate a part of or the whole position or substitute securities. In this case, you will be liable for any losses incurred due to such close-outs.

C. Under certain market conditions, an investor may find it difficult or impossible to execute transactions. For example, this situation can occur due to factors such as illiquidity i.e. when there are insufficient bids or offers or suspension of trading due to price limit or circuit breakers etc.

- D. In order to maintain market stability, the following steps may be adopted: changes in the margin rate, increases in the cash margin rate or others. These new measures may also be applied to the existing open interests. In such conditions, you will be required to put up additional margins or reduce your positions.
- E. You must ask your broker to provide the full details of derivatives contracts you plan to trade i.e. The contract specifications and the associated obligations.

2.2 Currency specific risks:

- 1. The profit or loss in transactions in foreign currency-denominated contracts, whether they are traded in your own or another jurisdiction, will be affected by fluctuations in currency rates where there is a need to convert from the currency denomination of the contract to another currency.
- 2. Under certain market conditions, you may find it difficult or impossible to liquidate a position. This can occur, for example when a currency is deregulated or fixed trading bands are widened.
- 3. Currency prices are highly volatile. Price movements for currencies are influenced by, among other things: changing supply-demand relationships; trade, fiscal, monetary, exchange control programs and policies of governments; foreign political and economic events and policies; changes in national and international interest rates and inflation; currency devaluation; and sentiment of the market place. None of these factors can be controlled by any individual advisor and no assurance can be given that an advisor's advice will result in profitable trades for a participating customer or that a customer will not incur losses from such events.

2.3 Risk of Option holders:

- 1. An option holder runs the risk of losing the entire amount paid for the option in a relatively short period of time. This risk reflects the nature of an option as a wasting asset which becomes worthless when it expires. An option holder who neither sells his option in the secondary market nor exercises it prior to its expiration will necessarily lose his entire investment in the option. If the price of the underlying does not change in the anticipated direction before the option expires, to an extent sufficient to cover the cost of the option, the investor may lose all or a significant part of his investment in the option.
- 2. The Exchanges may impose exercise restrictions and have absolute authority to restrict the exercise of options at certain times in specified circumstances.

2.4 Risks of Option Writers:

- 1. If the price movement of the underlying is not in the anticipated direction, the option writer runs the risks of losing substantial amount.
- 2. The risk of being an option writer may be reduced by the purchase of other options on the same underlying interest and thereby assuming a spread position or by acquiring other types of hedging positions in the options markets or other markets. However, even where the writer has assumed a spread or other hedging position, the risks may still be significant. A spread position is not necessarily less risky than a simple 'long' or 'short' position.
- 3. Transactions that involve buying and writing multiple options in combination, or buying or writing options in combination with buying or selling short the underlying interests, present additional risks to investors. Combination transactions, such as option spreads, are more complex than buying or writing a single option. And it should be further noted that, as in any area of investing, a complexity not well understood is, in itself, a risk factor. While this is not to suggest that combination strategies should not be considered, it is advisable, as is the case with all investments in options, to consult with someone who is experienced and knowledgeable with respect to the risks and potential rewards of combination transactions under various market circumstances.

3. TRADING THROUGH WIRELESS TECHNOLOGY/ SMART ORDER ROUTING OR ANY OTHER TECHNOLOGY:

Any additional provisions defining the features, risks, responsibilities, obligations and liabilities associated with securities trading through wireless technology/ smart order routing or any other technology should be brought to the notice of the client by the stock broker.

4. GENERAL

At the time of entering into agreement with the clients and branches we require them to agree to abide by the exposure limits set by us from time to time subject to the availability of funds in their accounts. Client exposure is settled on the basis of financial soundness (such as high, medium or low net worth client) and turnover position of the client. We follow the trading limit given by the Exchange for intra-day trading based on the base minimum and additional capital.

There are two types of exposures:

1. **Gross Exposure:** - Gross Exposure is calculated considering clients open positions and pending positions. On every order entry Gross Exposure is increased and on trade confirmation Gross Exposure is decreased.
2. **Net Exposure.-** When a trade confirmation is received then Clients Net Exposure is calculated based on the amount, which is traded. Net Exposure is increased on Trade Confirmation but if a Square off order gets traded then Net Exposure is decreased.

- a) Even after regular reminders, if client fails to make the payment of the margin money or pay-in amount, then we would square off his/her/their position and before taking such action in this direction, we telephonically/ vide e-mail explain all the details to the client about our proposed action in this regard.

Further, this shall be limited to the extent of settlement / margin obligations.

F) Shortages in obligations arising out of internal netting of trades :

If there are shortages due to internal netting of client positions, the position of both the clients would be squared off by taking exchange auction price for that particular securities for that particular settlement, and if the same was not available, then the previous day closing price may be considered for the same or the transaction will be closed out at 10% above the market rate or the closing rate of the security from trade date to T+2 day i.e. the auction day, whichever is higher.

ANTI-MONEY LAUNDERING (AML) - COMBATING FINANCING OF TERRORISM (CFT)

WHAT YOU MUST KNOW - FAQs

Help us in preventing money laundering / terrorist financing. Your assistance really matters us. Ever wondered why the Broker is asking you certain personal information which has hitherto never been called for? Such information can include documents evidencing source of funds/ income tax returns/ bank records etc. By providing this information to the Broker, at the time of account opening and subsequently as and when required, you are actually assisting the efforts in prevention of money laundering / terrorist financing. Here are the details, presented in the form of frequently asked questions (FAQs) to let you know how.

What is Money Laundering?

Money Laundering is the process by which criminals attempt to hide and disguise the true origin and ownership of the proceeds of their criminal activities, thereby avoiding prosecution, conviction and confiscation of the criminal funds. The term Money Laundering is also used when the funds are used for terrorist financing, though the origin of the funds may be legitimate.

Money-laundering has acquired a global character that not only threatens security, but also compromises the stability, transparency, and efficiency of financial systems. Money-laundering techniques are becoming more sophisticated and complex with each passing day.

The objective of AML & CFT Program is to prevent financial intermediaries from being used as a tool for the purpose of Money laundering & terrorist financing and to preserve the integrity of the financial system. In response to mounting concern over money laundering, the Financial Action Task Force on money laundering (FATF) was established by the G-7 Summit in Paris in 1989 to develop a co-ordinated international response. One of the first tasks of the FATF was to develop Recommendations, 40 in all, which set out the measures national governments should take to implement effective anti-money laundering programmes.

How much money is laundered per year?

The IMF has stated in 1996 that the aggregate size of money laundering in the world could be somewhere between two and five percent of the world's gross domestic product.

Using 1996 statistics, these percentages would indicate that money laundering ranged between USD 590 billion and USD 1.5 trillion. However it must be said that overall it is absolutely impossible to produce a reliable estimate of the amount of money laundered and therefore the FATF does not publish any figures in this regard.

How is money laundered?

In the initial - or placement - stage of money laundering, the launderer introduces his illegal profits into the financial system. This might be done by breaking up large amounts of cash into less conspicuous smaller sums that are then deposited directly into a bank account, or by purchasing a series of monetary instruments (cheques, money orders, etc.) that are then collected and deposited into accounts at another location. After the funds have entered the financial system, the second - or layering - stage takes place. In this phase, the launderer engages in a series of conversions or movements of the funds to distance them from their source. The funds might be channelled through the purchase and sales of investment instruments, or the launderer might simply wire the funds through a series of accounts at various banks across the globe. This use of widely scattered accounts for laundering is especially prevalent in those jurisdictions that do not cooperate in anti-money laundering investigations. In some instances, the launderer might disguise the transfers as payments for goods or services, thus giving them a legitimate appearance.

Having successfully processed his criminal profits through the first two phases the launderer then moves them to the third stage- Integration - in which the funds re-enter the legitimate economy. The launderer might choose to invest the funds into real estate, luxury assets, or business ventures.

Where does money laundering occur?

Money laundering can occur practically anywhere in the world. Generally, money launderers tend to seek out countries or sectors in which there is a low risk of detection due to weak or ineffective anti-money laundering programmes.

How does money laundering affect business, economic development & society at large?

Money laundering damages the integrity of the financial institution, entire society and undermines democracy and the rule of the law as it rewards corruption and crime.

There is a damping effect on foreign direct investment when a country's commercial and financial sectors are perceived to be subject to the control and influence of organised crime. Fighting money laundering and terrorist financing is therefore a part of creating a business friendly environment which is a precondition for lasting economic development.

25) _____
Client's Signature

The possible social and political costs of money laundering, if left unchecked or dealt with ineffectively, are serious. Organised crime can infiltrate financial institutions, acquire control of large sectors of the economy through investment, or offer bribes to public officials and indeed governments. The economic and political influence of criminal organisations can weaken the social fabric, collective ethical standards, and ultimately the democratic institutions of society.

How does fighting money laundering help fight crime?

Targeting the money laundering aspect of criminal activity and depriving the criminal of his ill-gotten gains means hitting him where he is vulnerable. Without a usable profit, the criminal activity will not continue.

What should individual governments be doing about it?

A great deal can be done to fight money laundering, and, indeed, many governments have already established comprehensive anti-money laundering regimes. These regimes aim to increase awareness of the phenomenon - both within the government and the private business sector - and then to provide the necessary legal or regulatory tools to the authorities charged with combating the problem.

Some of these tools include making the act of money laundering a crime; giving investigative agencies the authority to trace, seize and ultimately confiscate criminally derived assets; and building the necessary framework for permitting the agencies involved to exchange information among themselves and with counterparts in other countries.

What are Local regulations on AML/CFT?

- a) Prevention of Money Laundering Act, 2002 (PMLA) came in to force with effect from July 01, 2005 read with the prevention of Money Laundering (Amendment) Act, 2009.
- b) SEBI Guidelines on PMLA vide circular issued in January 2006 followed by latest Master circular issued in February 2010.
- c) Exchanges have also issued Guidelines on PMLA to be followed by all registered intermediary.

How is Money Laundering defined under PMLA 2002?

Section 3 of the Prevention of Money Laundering Act (PMLA) 2002 defines the "Offence of Money Laundering" as "Whosoever directly or indirectly attempts to indulge or knowingly assists or knowingly is party or is actually involved in any process or activity connected with the proceeds of crime and projecting it as untainted property shall be guilty of the offence of money laundering."

"Proceeds of crime" has been defined in Section 2 of the PMLA as the property derived or obtained directly or indirectly by any person, as a result of criminal activity relating to a scheduled offence or the value of such property. "Scheduled Offences", as per section 2 of PMLA, are specified in two parts of the schedule to PMLA. The value involved in offences specified in Part B should be Rs.30 lakhs or more.

Why KYC/AML Policy for Market Intermediary?

SEBI has instructed all Market Intermediary to adopt a KYC/AML Policy

- a) To prevent criminal elements from using the Capital Market for money laundering activities
- b) To enable the Broker to know/understand the customers and their financial dealings better, which in turn would help the Broker to manage risks prudently?
- c) To put in place appropriate controls for detection and reporting of suspicious activities in accordance with applicable laws/ laid down procedures.
- d) To comply with applicable laws and regulatory guidelines.
- e) To take necessary steps to ensure that the concerned staff is adequately trained in KYC/AML procedures.

What are the obligations of Market Intermediary under PMLA 2002?

Section 12 of PML Act 2002, places certain obligations on every banking company, financial institution and market intermediary, which include:

- a) Maintaining a record of prescribed transactions.
- b) Furnishing information of prescribed transactions to the specified authority (Financial Intelligence Unit-India (FIU-IND)).
- c) Verifying and maintaining records of the identity of its clients.
- d) Preserving records in respect of a, b, c above, for a period of 10 years from the date of cessation of transactions with the clients.

What is Financial Intelligence Unit-India (FIU-IND)?

FIU-IND is a central, national agency, set up by Government of India on 18th November, 2004, responsible for receiving (and as permitted, requesting), analyzing and disseminating to the competent authorities, disclosures of financial information (i) Concerning suspected proceeds of crime and potential financing of terrorism, or (ii) Required by national legislation or regulation, in order to combat money laundering and terrorist financing.

What are the transactions to be reported by Market intermediary to FIU-IND?

- c) Counterfeit currency transactions.
- d) Suspicious transactions.

What are suspicious transactions?

Rule 2(l)(g) of PMLA-2002 defines suspicious transactions as:

A transaction whether or not made in cash which, to a person acting in good faith-

- (a) gives rise to a reasonable ground of suspicion that it may involve the proceeds of crime; or
- (b) appears to be made in circumstances of unusual or unjustified complexity; or
- (c) appears to have no economic rationale or bonafide purpose; or
